Goal-oriented and self-driven junior full-stack web developer. Bringing together 6 months of immersive bootcamp experience to help in creating great applications and software.

Experience

JUN 21– SEPT 10

Contact-management App

Worked at **Thin-Air Labs** as a contractor for a 12-week engagement joining a team of about 6 people working as a **developer**. We developed a contact-management/address-book type **CRUD** app for a corporate client. During the project I had the chance to strengthen my **SQL** as well as my **REACT** and **JavaScript** skills while developing following **agile** principles.

Projects

SEPT 20 – FEB 21

Versa - E-commerce web app

My roles varied from design (using **Figma**) to coding (using **REACT**, **ExpressJS**) throughout our project. We learned best practices of using hashing for passwords (**BCrypt**) and authentication (**JWT**) on the backend. I gained a lot of experience with **REACT-hooks** and external libraries like **Styled-Components** for **CSS** or **Axios** for HTTP requests.

Education

SEPT 20 – MAR 21

Full-Stack web developer bootcamp/ EvolveU, Calgary, AB

Completed 6 months full-stack web development bootcamp. Gained skills in front-end development, programming, back-end systems, version control and agile methods. Completed an e-commerce app as final project.

SEPT 08 - JUN 10

Automotive Service Technology / Sait, Calgary, AB

Completed the program with a cumulative average of 3.16 GPA. Received Jason Lang scholarship for academic achievement second year. Completed courses in metallurgy, machining, welding, electronics, business, drafting, and alternate fuels.
